

HEALTHCARE SECTOR OVERVIEW AND HUMANITARIAN SUPPORT RESULTS

ANOTHER 21 HEALTHCARE FACILITIES WILL RECEIVE MODULAR BOILER HOUSES TO ENSURE BACKUP HEAT SUPPLY: AN AGREEMENT HAS BEEN SIGNED WITH THE WORLD HEALTH ORGANIZATION (WHO).

As a result of ongoing Russian attacks, Ukraine's energy infrastructure continues to suffer damage, posing risks to the uninterrupted operation of healthcare facilities, particularly during the autumn and winter season.

In response to these challenges, the Ministry of Health of Ukraine is systematically implementing measures to ensure the uninterrupted operation of hospitals and the continued provision of medical care to patients, even in emergency situations.

In particular, the Ministry of Health of Ukraine and the World Health Organization (WHO) recently signed an agreement to install 22 modular solid-fuel boiler houses at 21 healthcare facilities across different regions of Ukraine.

The modular solid-fuel boiler houses will serve as an autonomous backup heat supply source, enabling healthcare facilities to continue operating regardless of the condition of the centralized heating system. They will also help protect engineering systems from freezing-related damage and ensure the uninterrupted delivery of medical care.

This is particularly important for the operation of intensive care units, operating rooms, resuscitation units, and other critical hospital departments where patients require round-the-clock medical care. In healthcare facilities where the primary heating systems are operating reliably, the boiler houses will serve as a backup source of heat.

In addition, WHO will ensure the implementation and coordination of the entire project cycle, including the design, procurement and delivery of equipment, as well as the installation of modular boiler houses at the designated healthcare facilities.

The procurement and installation of the boiler houses are being carried out under the joint project of the Ministry of Health of Ukraine and the World Bank, "Health Enhancement And Lifesaving (HEAL Ukraine)."

The initiative is part of the Ministry of Health's and its international partners' broader efforts to strengthen the energy resilience of the healthcare system, implement business continuity plans for healthcare facilities, and ensure uninterrupted access to healthcare services even during emergencies.

MORE NEWS
ON HEALTHCARE SECTOR:

DAMAGE AND RESTORATION OF HEALTHCARE FACILITIES

Restoration efforts continue at medical facilities damaged by the war.

MINISTRY
OF HEALTH
OF UKRAINE

AS OF 01 JULY 2026

DESTROYED

335 UNITS WITHIN
124 HOSPITALS

DAMAGED

2 647 UNITS WITHIN
846 HOSPITALS

RECONSTRUCTED

755 UNITS - FULLY
318 UNITS - PARTIALLY

Healthcare facilities in the Donetsk, Kharkiv, Kherson, Luhansk, Zaporizhka, and Mykolaiv Oblasts have sustained the most significant damage

- + **81** facilities that had been previously restored have sustained damage again.
- + **1,610** facilities continue to provide medical assistance.
- + **186** facilities are operating partially.
- + **232** facilities have been evacuated (relocated) to alternative premises.

Information on medical facilities in the temporarily occupied territories is currently limited due to the lack of available data.

THE MINISTRY OF HEALTH OF UKRAINE, TOGETHER WITH INTERNATIONAL PARTNERS, CONTINUES SYSTEMATIC WORK ON THE REHABILITATION OF DAMAGED MEDICAL INSTITUTIONS AND IS DOING EVERYTHING POSSIBLE TO ENSURE THAT EVERY PATIENT HAS THE ABILITY TO RECEIVE THE NECESSARY ASSISTANCE EVEN IN EXTREMELY DIFFICULT CONDITIONS.

KEY HEALTH STATISTICS (DISEASE RATES)

As of July 1, 2026, there is the data on weekly reporting to the National Security and Defense Council of Ukraine regarding morbidity and mortality from the following infectious diseases:

DISEASE	NUMBER OF REPORTED CASES*
COVID-19	87
ACUTE RESPIRATORY VIRAL INFECTION, INCLUDING INFLUENZA (excluding COVID-19)	215 752
TUBERCULOSIS (new cases)	872
MEASLES	223
PERTUSSIS	63
VIRAL HEPATITIS	701
Including:	
ACUTE HEPATITIS A	38
ACUTE HEPATITIS B	25
ACUTE HEPATITIS C	33
CHRONIC HEPATITIS B	111
CHRONIC HEPATITIS C	494

*June 2026

On 23–24 June, the annual meeting of specialists responsible for epidemiological and laboratory surveillance of influenza and acute respiratory viral infections (ARVIs) was held. The event was organized by the **Public Health Center of the Ministry of Health of Ukraine (PHC)**. The meeting brought together epidemiologists, virologists, specialists from regional Centers for Disease Control and Prevention, and representatives of international organizations.

The course of the epidemic in Ukraine was consistent with the general trends observed in countries of the European Region during the **2025–2026 season**. Ukraine

remains part of a single epidemiological area with the countries of the **World Health Organization’s (WHO) European Region**, and the results of national surveillance for respiratory viruses are not only an important part of regional risk assessment but also a significant contribution to global influenza surveillance.

Despite the challenges posed by martial law – such as population displacement, the additional strain on the healthcare system, and the enemy’s destruction of medical infrastructure – the epidemiological surveillance system continued to fulfil its primary mission during the **2025–2026 epidemic season**: to promptly identify epidemic threats, assess the risks of infectious disease outbreaks, and ensure that informed decisions are made to contain their spread.

During the season, more than **4.2 million cases** of influenza and acute respiratory viral infections (ARVIs) were reported in Ukraine, representing a **7.1%** decrease compared with the previous epidemic season. Overall, **11.9%** of the country’s population sought medical care for respiratory infections. In most regions, epidemic activity remained at a low level.

HUMANITARIAN AND CHARITABLE AID RECEIVED IN JUNE 2026

MINISTRY
OF HEALTH
OF UKRAINE

COUNTRIES:

- USA • NORWAY • GERMANY • POLAND • FRANCE
- FINLAND • HUNGARY • UKRAINE

DONORS:

- RESTORINGVISION • GOVERNMENT OF NORWAY • ACTION MEDEOR
- POLPHARMA S.A. • CHU DE TOULOUSE • GOVERNMENT OF FINLAND
- HUNGARIAN PHARMACEUTICAL COMPANY EGIS • LLC SM-FARM
- NGO "PUBLIC HEALTH MISSION"

MEDICINES:

- INHIXA • MAVIRET • IBUFEN D FORTE • FLUCONAZOLE • DEXAMETHASONE
- OMEPRAZOLE • BETADINE

MEDICAL PRODUCTS:

- PRESCRIPTION GLASSES • HIV EARLY DETECTION KITS

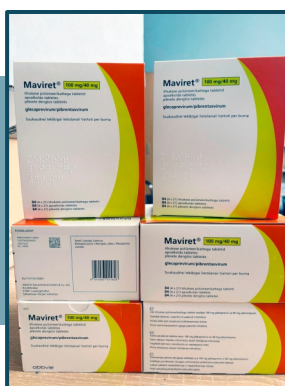

EQUIPMENT:

- CEILING-MOUNTED MEDICAL CONSOLES

MEDICAL TRANSPORT:

- TYPE B AMBULANCE

THE MINISTRY OF HEALTH OF UKRAINE EXPRESSES ITS DEEPEST GRATITUDE TO PARTNERS
FOR THEIR CONTINUOUS SUPPORT AND ASSISTANCE IN THIS DIFFICULT TIME FOR THE COUNTRY

NEED FOR MEDICAL HUMANITARIAN AID

To support the stable operation of the healthcare system under extreme pressure, an updated list of priority needs has been developed:

MINISTRY
OF HEALTH
OF UKRAINE

MEDICINAL PRODUCTS

MEDICAL SUPPLIES

VACCINES

SURGICAL INSTRUMENTS

DETAILED LIST OF NEEDS
VIA QR CODE:

LAB EQUIPMENT

MEDICAL EQUIPMENT

MEDICAL TRANSPORT

POWER GENERATORS
