**Goals**

Goal Number	Goal Description
1	To sustain effective TB responses in Ukraine through implementation of evidence-based people-centered approaches, with special emphases on management of drug-resistant TB and key population groups at risk
2	To sustain effective HIV response in Ukraine through implementation of evidence-based people-centered approaches, with special emphases on key population groups at risk
3	To ensure overall coordination and complementarity of activities and programs and a proper mechanism for stakeholder involvement in discussion and decision-making, sustainable funding of the related programs and activities, improve service organization and delivery, improve data quality for activity planning, continuously build human resource capacity and maintain high standards in the field of education and science, using human rights and gender-sensitive approaches and removing barriers

Objectives	
Objective Number	Objective Description
1	Ensure universal access to timely and quality TB case detection and diagnosis of DR-TB by rolling out rapid molecular testing, improving quality and coverage of DST and targeted active case finding in key
2	Improve outcomes of DR-TB patients by implementing modified shorter treatment regimens and scaling up people-centered approaches with comprehensive adherence support
3	Reduce TB transmission by scaling up effective preventive treatment and improving infection control
4	Enable conducive health system environment and effective management of the National TB Program
5	Reduce HIV transmission by expanding coverage of innovative prevention interventions in key populations and eliminating MTCT
6	Improve 90-90-90 cascade by promoting innovative testing approaches, increasing early HIV detection, early ART initiation, improving quality of care by, ensuring access to quality assured ARVs and treatment monitoring, and implementing differentiated people-centered models of care

7	Enable conducive health system environment and effective management of the National HIV Response
8	Leverage ongoing health delivery and health financing reform to accelerate adoption of patient-centered approaches, integration of service provision, improve strategic purchasing of TB and HIV services, ensure institutionalization of mechanisms for procurement, human resources for health and improve data systems and available strategic information
9	Empower people living with, at risk of and affected by HIV and ensure community-led TB and HIV responses through community based monitoring, social mobilization and community linkages and coordination
10	Remove human rights and gender barriers and achieve zero discrimination towards people with TB and HIV and representatives of key and vulnerable groups

Modules	
Module Number	Module Name
1	Prevention
2	Differentiated HIV Testing Services
3	Treatment, care and support
4	TB/HIV
5	TB care and prevention
6	MDR-TB
7	Reducing human rights-related barriers to HIV/TB services
8	Removing human rights and gender related barriers to TB services

9	Program management
10	RSSH: Community systems strengthening
11	RSSH: Laboratory systems
12	RSSH: Health management information systems and M&E
13	RSSH: Health products management systems
14	
15	

Only required if you have Work plan Tracking Measures				
Interventions				
Intervention Number	Modules	Standard Intervention	Custom Intervention (only if "Other" intervention is chosen)	Population
1	Removing human rights and gender related barriers to TB services	Stigma and discrimination reduction (TB)		Not applicable
2	RSSH: Community systems strengthening	Community-based monitoring		Not applicable
3	RSSH: Laboratory systems	Quality management systems and accreditation		Not applicable
4	RSSH: Health management information systems and M&E	Routine reporting		Not applicable
5	Reducing human rights-related barriers to HIV/TB services	HIV and HIV/TB-related legal services		Not applicable
